

## Making connections: accelerating innovation in flexible and hybrid electronics

innoLAE 2020 industry day is the UK's leading networking event focusing on the industrialisation of printed electronics based technologies.

Come along to the industry day to gain access to decision-makers associated with large-area electronics. You will hear from industry experts on what the market drivers are and how the technology can be used across markets to get significant benefits. You'll also have an opportunity to be part of the networking session and gain access to leaders in research, technology innovation and manufacturing active today in printed, flexible and large-area electronics.

Join CPI for this exciting event and come away with an understanding of how flexible large-area electronics can benefit your business and the markets you work in. Drinks and canapés will be provided in the networking session which will round off the event and lead onto the innoLAE 2020 conference the following day.

## Agenda

- 12:00     **Confirmed Agenda**  
          Arrival, registration & lunch
- 13:15     Welcome and Introduction
- 13:30     Key Note speaker **Raghu Das -IDTechEx**
- 14:00     Technology Overview -**Simon Johnson -CPI**
- 14:20     The challenges and opportunities the industry is facing with real-life market examples.  
**Alastair Hanlon — PragmatIC**  
**Steve Garrett- NIFCO**
- 14:50     SME quick-fire pitches
- 15:05     Break
- 15:20     **Panel Discussion**  
          Unlocking the market opportunities for printed, flexible and large-area electronics  
**Jonas Vandecruys — ABinbev**  
**Andrew Smith -GSK**  
**Neil Chilton – Printed Electronics Limited**
- 16:20     SME quick-fire pitches
- 16:35     Key Note speaker **Sven Strassburg — IBM**
- 17:05     Networking drinks and canapes
- 18:30     Event Close
