

innoLAE 2020

Platinum Sponsor

CPI is the UK's national technology and innovation centre to serve and support the development of applications that utilise printed electronics.

CPI offers world class, open access capability for the scale up and commercialisation of new, innovative printed electronic products and applications. Our facilities and expertise provide clients with the environment to understand how their products and processes perform under manufacturing conditions and accelerate their commercial realisation.

Silver Sponsors

NovaCentrix offers industry leading photonic curing tools, conductive inks, material and expertise enabling development and production of next generation printed electronic devices - some already on the market. PulseForge® tools utilize photonic curing which is a cutting edge technology that dries, sinters, and anneals functional inks in milliseconds on low-temperature, flexible substrates such as paper and plastic. PulseForge tools can save time and money, and enable new types of products in applications like solar, RFID, display, packaging, and circuit. Our Metalon® conductive inks capitalize on advanced materials and formulation to provide conductivity options for additive manufacturing of printed electronics with stretchable, solderable, resistive, and magnetic qualities.

Navigating today's ever-changing technology landscape is one thing. Imagining this landscape 20 years from now, and solving the problems that will arise there, is another. That's exactly what Arm Research strives to do. Through a combination of in-house research and collaboration with academic and industrial partners, Arm Research analyses the disruptions impacting our industry and create advanced solutions, many years ahead of deployment.

Semitronics

Semitronics are UK Partners of leading suppliers to the Printed Electronics, Semiconductor and Nanotechnology markets and distribute process equipment and materials focused on Emerging Electronics within the UK and Ireland. Suppliers include:

- Optomec
- Meyer Burger
- NovaCentrix
- Coatema
